

# TRAVELER SERVICES

www.visitmt.com/travelerservices · 800.847.4868

You're ready to come to Montana, but you're wondering—is there really a train there? Will the national parks be open? Are there buses to the ski hills? Use these Traveler Services to show up prepared, informed and practically passing for a local.

## GETTING HERE

It's easiest to explore Montana by car, so if you aren't already driving here, make plans to rent a vehicle once you arrive. Fly into larger towns or roll in aboard Amtrak's Empire Builder (traversing the northern half of the state), then drive a rental from wherever you land. If you plan on hitting backroads and gravel, or even just iffy weather, upgrade to four-wheel-drive for more traction. A high-clearance vehicle is necessary only for a few limited remote destinations like well-off-the-beaten-path trailheads.

You can also tour the state via commercial bus lines, which travel to major cities and some smaller towns, or join private bus tours.

**AIR TRAVEL** Direct flights (some seasonal) are available from Seattle, San Francisco, Los Angeles, Las Vegas, Salt Lake City, Phoenix, Denver, Minneapolis/St. Paul, Newark, Chicago, Portland and Atlanta. Go to [visitmt.com/transportation/air\\_service](http://visitmt.com/transportation/air_service) for a list of airports and carriers.

**RAIL TRAVEL** Amtrak's Empire Builder runs across northern Montana from Wolf Point through Havre, Glacier National Park and on to Libby. Bonus: there's a glass-topped viewing car. [www.amtrak.com](http://www.amtrak.com)

**PASSPORT REQUIREMENT** All persons traveling into the U.S. are required to present a passport or other valid travel document to enter or reenter the country. Visit [cbp.gov](http://cbp.gov) for updated requirements.

TRAVELER SERVICES

# TRAVELING WITHIN MONTANA

**DRIVING IN MONTANA** Montana's highways are maintained year-round, and travel on the main roads shouldn't be a problem in good weather. However, be prepared for long distances, sparsely populated areas, variable road conditions, a few steep mountain passes, storms, occasional two-way traffic and the possibility of wildlife, livestock and farm equipment on the road.

Montana lives up to its huge reputation—the most direct route from east to west takes more than ten hours to drive. The trip from Glacier National Park's southernmost entrance to the northernmost entrance of Yellowstone takes a little over seven. To be a prepared traveler, always keep your gas tank more than half full and bring along water and some extra snacks, since distances between towns can be significant and services aren't always open.

Montana's dramatic topography, elevation extremes and northern climates can make for swift, unexpected changes in the weather, no matter what time of year.

Visitor information centers around the state provide road and weather information. Most Montanans keep a spare coat stashed in the car for weather surprises—even in the summer—just in case.

Speed limits are posted, but occasionally it's necessary to drive at reduced speed when road conditions such as snow, ice, heavy rain, fog or high winds require extra caution.

Beware the downside to Montana's frequent wildlife sightings—deer, antelope, moose, bison and other animals sometimes leap into the road

unpredictably. Be alert, especially near deer crossing signs and around dawn and dusk, when deer are most active. If you see any deer or elk at all, slow down and remember that others of the herd are likely nearby. Use your high beams when driving in darkness, unless oncoming cars prevent it.

**VEHICLE RENTALS** The majority of Montana travelers opt for the flexibility and freedom of driving. Various rental vehicles are available depending on your travel plans and companions. Find a listing of cities with car rentals at [visitmt.com/carrentals](http://visitmt.com/carrentals).

# CONNECT WITH MONTANA

*Moose near Fishercap Lake in Glacier National Park*

Start dreaming up your Montana trip (or planning it on the fly).  
Grab on and discover more online with your mobile phone or tablet.

## **FACEBOOK**

There's no love button, so you'll have to settle for "liking" Montana.

[www.facebook.com/visitmontana](http://www.facebook.com/visitmontana)

## **TWITTER**

While we're usually distracted by another kind of twitter (bird watching, anyone?) we keep our virtual tidbits updated, too.

[www.twitter.com/visitmontana](http://www.twitter.com/visitmontana)

## **INSTAGRAM**

Follow us on Instagram for a constant stream of photos guaranteed to make you pine for your next Montana trip.

[www.instagram.com/visitmontana](http://www.instagram.com/visitmontana)

## **TUMBLR**

Share your favorite #MontanaMoment to inspire others or browse the photo gallery to kick off your next adventure.

[www.montanamoment.tumblr.com](http://www.montanamoment.tumblr.com)

## **VISITMT.COM**

*VisitMT.com* is an encyclopedic, user-friendly resource for trip ideas and general wanderlust. Here, you'll find a wealth of varied information—motorcycle route ideas, a compilation of powwows, craft breweries and wineries, ghost town rundowns and just about anything else you can think of.

[www.visitmt.com](http://www.visitmt.com)

## MADE IN MONTANA

*In Montana we think it is okay to be label conscious. While indulging in retail therapy, look for Made in Montana logos on product labels signifying them as authentic local wares.*

*If you can't shop here in person, try the next best thing—find Made in Montana goods online at [MadeInMontanaUSA.com](http://MadeInMontanaUSA.com).*

**AROUND TOWN** Most larger towns have at least basic bus services, and a few taxi and shuttle services are available near the major airports. For in-town, fair-weather commuting, consider renting a bike from a local outdoor store.

**BUSES AND BUS TOURS** If you'd rather view the scenery than watch the road, a variety of private operators offer bus tours, and Greyhound serves major cities and some small towns. Yellowstone National Park and Glacier National Park both offer bus tours ([nps.gov/yell](http://nps.gov/yell) and [nps.gov/glac](http://nps.gov/glac)), and Glacier shuttles visitors through the park ([nps.gov/glac/planyourvisit/shuttles.htm](http://nps.gov/glac/planyourvisit/shuttles.htm)).

**AIRPORT/SKI AREA SHUTTLES** Airport shuttles whisk you from baggage claim to local lodging, and some ski resorts offer a daily shuttle from nearby towns.

**SNOWPLOW SAFETY** When you encounter a snowplow, know what to do:

- + Plows travel slowly, usually 25 to 30 miles per hour, so if you are stuck behind one, you may be tempted to pass. Before you do, keep in mind that snowplow drivers may have a difficult time seeing you, especially if they are clearing the road in front of them. Which raises another point—would you rather drive a freshly plowed road or have to break the trail?
- + Never pass a plow on the right. Some snowplows are equipped with a “wing plow,” an 8-foot extension off the right side of the truck that can be difficult to see.
- + Plows aren't just removing snow. They also spread sand or deicer on the road. Leave enough room between the plow and your vehicle to avoid being sprayed.

*Learning to snowplow*

## DIAL 511 FOR 24-HOUR REAL-TIME INFORMATION

- + Winter driving conditions
- + Weather forecasts
- + Construction updates
- + Road closures and major delays
- + Weight and speed limit restrictions
- + Speak with a live travel counselor Monday-Friday, 7 a.m. - 6 p.m. (press 5 and follow prompt)
- + Alternate number **800.226.ROAD (7623)** or **TTY 800.335.7592** or visit [mdt511.com](http://mdt511.com)

**ASSISTANCE FOR TRAVELERS WITH DISABILITIES** For information about accessibility, contact the Montana Independent Living Project at **800.735.6457** or [milp.us](http://milp.us).

**GEOLOGIC ROAD SIGNS** While driving around the state, don't miss roadside geological markers/interpretive signs located at more than 50 locations. Each sign provides information on a geological or paleontological point of interest. [www.mdt.mt.gov/travinfo/geomarkers.shtml](http://www.mdt.mt.gov/travinfo/geomarkers.shtml)

## THE OUTDOORS

### NATIONAL PARKS

**GLACIER NATIONAL PARK** is open year-round, but the Going-to-the-Sun Road and many park services are only open from mid-May to mid-September, weather dependent. For more information on road plowing, trails, safety, weather conditions and park passes, visit [nps.gov/glac](http://nps.gov/glac).

**YELLOWSTONE NATIONAL PARK** is open year-round; however, many of the park's roads close to vehicles (except over snow) in November and reopen in May. For more information on spring biking, major attractions, park fees and more, visit [nps.gov/yell](http://nps.gov/yell).

### STATE PARKS

Visit Montana State Parks ([stateparks.mt.gov](http://stateparks.mt.gov)), then enjoy camping, hiking, fishing, swimming, boating and more and discover some of the greatest natural and cultural treasures on Earth. Book your campsite, cabin, tepee and yurt accommodations online at [stateparks.mt.gov](http://stateparks.mt.gov) or by phone at **855.922.6768**. Reservations can be made nine months in advance of your intended stay and no later than two days prior to your arrival.

## NATIONAL FORESTS

Montana is home to 16.8 million acres of publicly accessible national forests and grasslands—roughly the total land area of Vermont, New Hampshire and Massachusetts combined. "Forest" here takes a broad definition, ranging from the rugged mountaintops and steep, timbered canyons of western Montana to the badlands and prairies of eastern Montana.

There are multiple ways to make the most of these protected lands, starting with 15 downhill ski areas operating with special-use permits on national forest land. Cross-country skiers have their pick of over 400 miles (644 km) of designated ski-touring trails, along with thousands of miles of ungroomed recreational territory, while snowmobilers can explore more than 2,500 miles of designated trails and endless backcountry. When the snow melts, the national forests give hikers, bikers, rock climbers, anglers and backpackers access to a lifetime (or more) worth of adventures.

You don't necessarily need a tent to stay overnight in the national forests; instead, try bunking in one of the Forest Service's rustic cabins or lookouts. Cabins are furnished with the bare basics (table, chairs, woodstove and bunks), but you'll need to bring your own bedding. For a Recreational Cabin and Lookout Directory, contact the individual national forest (see contact information below) or go to [www.recreation.gov](http://www.recreation.gov).

*A Guide to Your Northern Region National Forests* describes the national forests in Montana—pick one up from the U.S.D.A. Forest Service, Northern Region, [www.fs.usda.gov/r1](http://www.fs.usda.gov/r1), or the individual national forest.

**WINTER SAFETY**

**WIND CHILL** With wind chill, winds make cold temperatures feel measurably colder. 30 degrees on a windy day is the virtual equivalent of a calm 15 degrees. Exposure to cold, biting air for long periods of time can put you at risk for frostbite, frostnip, hypothermia and other health complications. See Wind Chill Chart to the left.

**HYPOTHERMIA** Use a winter vacation in Montana as an excuse to update your wardrobe and invest in mittens and hats—all good prevention against the bane of winter outdoor activities: hypothermia. Hypothermia occurs when the body temperature drops to less than 95°F, bringing on uncontrollable shivering, slow speech, memory lapses, frequent stumbling, drowsiness and exhaustion.

If you suspect hypothermia in one of your travel companions (or yourself), retreat to warm shelter as soon as possible. Warm the person slowly, starting with the trunk and moving to arms and legs last, and seek immediate medical assistance. If possible, change the victim into dry clothing and wrap him or her in a blanket or sleeping bag. You can use your own body heat to help speed the warming process.

Never give a hypothermia victim caffeine or alcohol. Both can hasten the ill effects of cold body temperatures.

**AVALANCHE SAFETY** Before heading onto snowy slopes, make sure that you're well-educated about the conditions that cause avalanches and prepared to handle one if needed. Call the local avalanche center hotline, visit their websites (listed below), take an avalanche class, review the North American Public Avalanche Danger Scale at left and always carry the proper equipment. Understanding the basics of terrain, weather, snowpack and human factors that contribute to avalanches will help prevent needless tragedy in the backcountry.

For more information, contact the avalanche center in the area you plan to visit:

[www.noaa.gov](http://www.noaa.gov)

North American Public Avalanche Danger Scale				
Avalanche danger is determined by the likelihood, size and distribution of avalanches.				
Danger Level	Travel Advice	Likelihood of Avalanches	Avalanche Size and Distribution	
<b>5 Extreme</b>	 Avoid all avalanche terrain.	Natural and human-triggered avalanches certain.	Large to very large avalanches in many areas.	
<b>4 High</b>	 Very dangerous avalanche conditions. Travel in avalanche terrain <u>not</u> recommended.	Natural avalanches likely; human-triggered avalanches very likely.	Large avalanches in many areas; or very large avalanches in specific areas.	
<b>3 Considerable</b>	 Dangerous avalanche conditions. Careful snowpack evaluation, cautious route-finding and conservative decision-making essential.	Natural avalanches possible; human-triggered avalanches likely.	Small avalanches in many areas; or large avalanches in specific areas; or very large avalanches in isolated areas.	
<b>2 Moderate</b>	 Heightened avalanche conditions on specific terrain features. Evaluate snow and terrain carefully; identify features of concern.	Natural avalanches unlikely; human-triggered avalanches possible.	Small avalanches in specific areas; or large avalanches in isolated areas.	
<b>1 Low</b>	 Generally safe avalanche conditions. Watch for unstable snow on isolated terrain features.	Natural and human-triggered avalanches unlikely.	Small avalanches in isolated areas or extreme terrain.	

Safe backcountry travel requires training and experience. You control your own risk by choosing where, when and how you travel.

## SUSTAINING MONTANA'S RESOURCES

The Montana Department of Natural Resources and Conservation (DNRC) administers Montana's state school trust lands, including state forests. The agency is responsible for the stewardship, sustainability and improvement of the resources and benefits derived from these lands for current and future generations.

Those who possess a Montana Wildlife Conservation License may hunt, fish and trap on legally accessible state lands; however, trappers must also acquire a

Special Recreational Use License from DNRC prior to trapping on state lands. For most all other types of non-commercial and non-concentrated recreational activities, sportsmen and women 12 and older must possess a State Land General Recreational Use License, which is available from Montana Fish, Wildlife & Parks (FWP) license agents. Use of motorized vehicles, including use of snowmobiles on leased or licensed land, is restricted to public roads (subject to traffic laws/regulations) and on other roads that DNRC may designate open. On unleased or unlicensed land, snowmobile use is allowed in all areas unless prohibited by DNRC. Pamphlets that provide further information regarding the rules, regulations and restrictions governing these and other activities on state lands are available from FWP offices, license agents and DNRC offices.

## STOP AQUATIC HITCHHIKERS

*With just three easy steps, you can do your part to help stop the spread of aquatic invasive species, like plants, mussels and parasites in Montana's waters.*

### 1. INSPECT

*After leaving a lake or stream, inspect your boat, engine, trailer, anchor, waders and other fishing and boating gear for mud, water and vegetation that could carry aquatic invasive species.*

### 2. CLEAN

*Completely remove all mud, water and vegetation you find. Boaters should use a pressurized power sprayer, found at most do-it-yourself car washes. The hot water helps kill organisms and the pressure removes mud and vegetation. No need to use soap or chemicals.*

### 3. DRY

*Aquatic invaders can survive only in water and wet areas. By drying your boating and fishing equipment thoroughly, you will kill most invasive species. The longer you can keep your boat, trailer, waders, wading boots and other equipment outside in the hot sun between fishing trips, the better.*

*Remember, it is unlawful to move live fish, aquatic invertebrates or plants from one body of water to another without authorization from Montana Fish, Wildlife & Parks. It is also unlawful to release any live aquarium or bait fish.*

A lazy afternoon fishing on the Yellowstone River

# CHAMBERS AND CONVENTION AND VISITORS BUREAUS

www.visitmt.com/chambers · 800.847.4868

Welcome!
